

CONNECT

for Sharelink

EASILY MIGRATE OPEN TEXT LIVELINK DATA

Easily migrate Open Text Livelink data.

Connect for Sharelink allows organizations to easily migrate data from Open Text Livelink to SharePoint in 3 easy steps.

Export

Designed as a standard Livelink module, exporting data is very fast and efficient. Users can export applicable data from the Livelink system and stage it on a file system. Dynamic reports are also available to help identify problem areas prior to exporting data.

Mapping

Map Livelink data to SharePoint sites via a powerful and easy to use graphical user interface. Users have the option to preserve the same folder hierarchy or dynamically reorganize content. Reports are also available that will identify problem areas such as large files, restricted file extensions, long paths, etc.

Deployment

Deploy the Livelink data to SharePoint via a deployment wizard that will guide you through the process. Choose options to preserve metadata, permissions, etc.

Benefits

Reduce Migration Cost and Save Time

Migration tools are simple to install and easy to use. There are no complicated configuration steps required and the focus can be on data migrations. No need to develop custom export/import tools.

Full Fidelity Migrations

Maintain all document versions, metadata, permissions, modified/created dates, modified/created by users, etc.

Key Features

- Reduce Migration Costs
- Easy to use
- Automatically handles illegal characters and long paths
- Reorganize data
- Zero Downtime
- Retain important metadata
- Maintain versions and permissions
- Compliant – uses both Collaboration and SharePoint APIs
- Tuned for high performance

Specifications

Servers: Livelink® 8.x and 9.x to
SharePoint 2007/2010
