

Corporate Overview

Synergy provides products and solutions for Enterprise Content Management Systems. We specialize in value added products for Microsoft® SharePoint™ and other technologies. Because Synergy has been developing SharePoint solutions with our partners and customers for several years, we are better positioned than ever to deliver innovative solutions that extend SharePoint and bring value to our customers and partners.

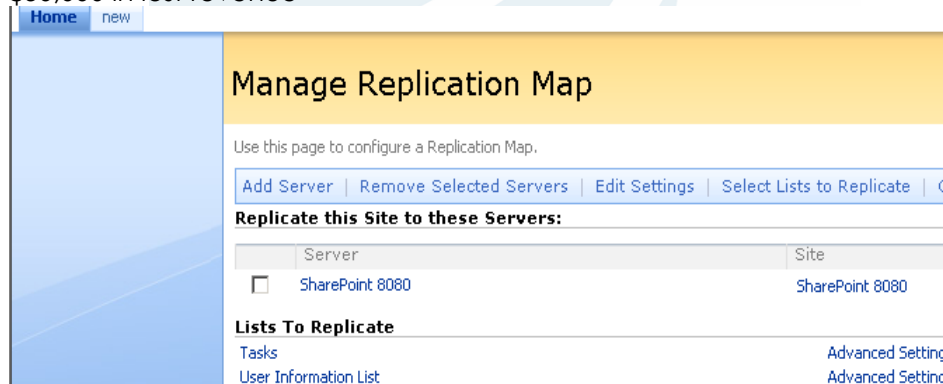

Products: As Enterprise Content Management experts we provide cost-effective, supported add-on products to Microsoft Office SharePoint Server 2007, SharePoint™ Portal Server 2003 and Windows SharePoint™ Services as an alternative to custom development in the areas of data replication, compliance, management and data migration. Products such as Replicator, Management Central, Audit and Livemail scale from the department to the enterprise and assist organizations in all industries to better enable business processes.

We have assembled these products to solve business needs like yours—from implementing high-ROI business processes at major Financial Institutions to providing solutions that save individual companies money in their own CKM environments.

Case Study

Increased Connectivity

SeaBird Exploration provides seismic services for the international Oil and Gas Industry. The Replicator for SharePoint provides ship to shore connectivity for the distribution of key technical and safety data to each of the ships in the fleet. "Without Synergy's Replicator," said Stig Mathiassen, Information Systems Manager, "we would not have been able to implement our QHSE-MS compliance system to allow our ships at sea to access up-to-date data on board. Previously each day our ships were in port waiting for the data to be delivered was costing us \$50,000 in lost revenue"
