

AUDIT YOUR SHAREPOINT™ IMPLEMENTATION WITH GREATER GRANULARITY.

Synergy's Audit Module provides enhanced tracking on folders and documents. The need for tracking events such as viewing, adding, moving and all other operations on a document are key requirements in certain environments.

FOLDER AUDIT EVENTS INCLUDE: Add, Rename, Move and Delete.

DOCUMENT AUDIT EVENTS INCLUDE: View, Add, Rename, Move, Check-Out, Check-In, Uncheck-Out, Update and Delete.

BENEFITS

INCREASE ACCOUNTABILITY

Tracking activities on documents and folder provides a level of functionality that is not provided in the standard SharePoint™ application.

EASE OF REPORTING

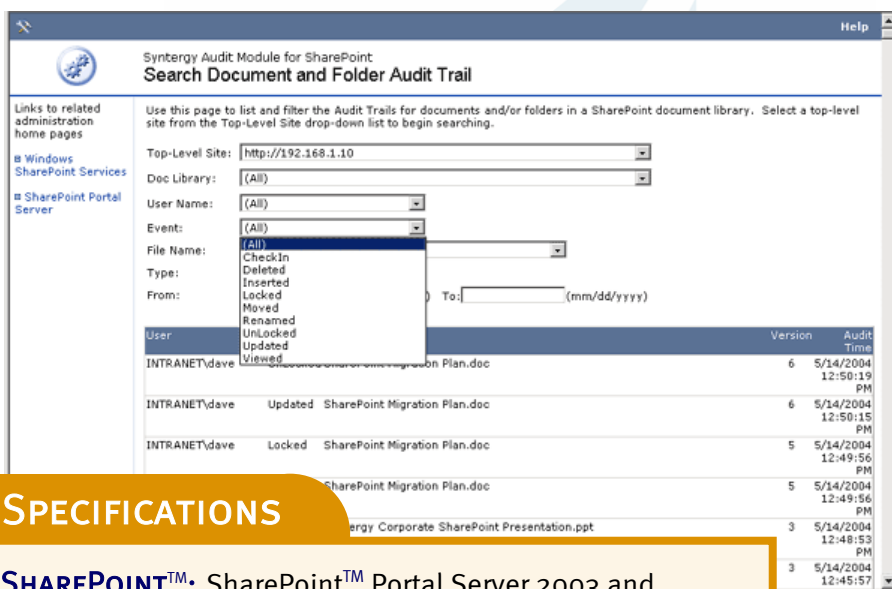

Additional functionality added to Admin Central allows easy audit reports to be generated. In addition the "Audit Trail..." pull down menu for an object will contain the audit detail information.

KEY FEATURES

- Support for auditing from web based applications and network operations
- Audit Folder Events
- Audit Document Events
- Pull down menu "AuditTrail..." on each document
- Detailed Reporting available for Admin users
- Provides information SharePoint™ does not: who viewed/deleted a document along with detailed activity (lock/unlock etc)
